Hi:

I would recommend sending out a general notice letter to our new arranger PRP, Stolt Nielsson, first; give them a month? A little more? To absorb and make contact with the group; and then follow up with new letters to everyone with a demand and a draft CD for the limited actions required, as well as cost recovery.

What I do not recall is whether our previous general notice letters contained a demand; if so, we should certainly include one for Stolt Nielsson (sorry if my spelling is off).

About the letter, I would make the following modifications: 1) I would add a sentence to the effect that waste materials at the site have resulted in contamination of site groundwater; I would add a sentence noting the finalization of the ROD (we could send them a copy), and say that it describes in more detail the contamination at the site and past response actions; and I would probably do away with the separate section describing site response actions, as the background section, to me anyway, and certainly the ROD, include most of them.

I'm not sure about my availability next week, but I will e-mail Monday so we can arrange a time, if possible. If you want to start the GNL in concurrence, that would be great.

Thanks.

Please review and let me know if this is the right path for us to take. There is one section where help is needed from Gary. Its also time for a Site Team Meeting. Lets plan for next week on either Wednesday or Thursday. Thanks.
